ALIENS EAGER TO ENTER THIS COUNTRY

NO RUSE IS OVERLOOKED TO ENTER THE UNITED STATES

Disguises Supplied By Smuggling Bands That Operate Along All Frontiers of the Land--Some Use Girders of Bridge At Niagara To Cross While Others Travel Afoot To Find a Remote Area To Cross--Many Women Induce Citizens To Marry Them and In That Way Seek Entrance and Gain Admission As the Wife of An American.

Thousands of aliens barred from the United States by quota restrictions, are swarming along America's vast land borders and resorting to every conceivable trick and deception to slip into the country, Harry E. Hull, commissioner-general of immigration, announced Tuesday at Washington D. C.

In a personal survey of the Canadian border, just completed, Hull found that:

1. Aliens are attempting to steal into the country from Canada by crawling across the under girders of Niagara bridge. Confederates help aliens to scale the cliffs on both sides after the perilous crossing of the gorge.

2. Women persuade American citizens to marry them in order to win quick entry under a non-quota status.

3. Disguises are supplied by organized bands of alien smugglers to "Americanize" foreigners and rush them past inspectors amid the throngs of tourists.

Aliens travel afoot for weeks to search out remote sections of the border, inadequately guarded, Hull declared.

By posing as "farmers" many gain preferential entry to neighboring countries, after which new ruses are employed to spirit them into the United States thru the "back door."

"I have never realized fully the lengths to which aliens actually are going in order to obtain entry in disregard of the law," Hull said, adding:

"Virtually the entire extent of foreign contiguous territory is filled with aliens who are at this time seeking admission to this country.

"There are no doubt considerable or ganized smuggling activities designed to aid the liens in gaining unlawful admittance.

"Having gained a foothold on this continent, aliens shortly move near a point on the international boundary and cast about for a mothd of gaining entry.

"The law provides that an American citizen may petition for a non-quota status for his wife, and the remedy is obvious where an alien woman is seeking admittance and can persuade an American citizen to marry her.

"Another method resorted to is for an alien smuggler to take a European woman, give him a thoro overhauling to make him look as much as possible like a resident of this continent, giving him a garb that will serve to identify him with the usual mass of our population, then put him in a crowd at a busy crossing and trust to passing the alien by the inspector."

The border force must be enlarged to block illegal entries at all points, Hull declared.

"The border patrol, as well as other branches of the immigration service, is doing a wonderful work to prevent these," he said. "The great trouble is

FAMILY REUNION

The Wardell-Barthelmas family reunion will be held at the home of Mr. and Mrs. Thomas Wardell in Wayne township, Sunday, September 5.

that while the regular avenues of travel are pretty well controlled, the force is not large enough to cover the entire border as it should be covered if we are to enforce the law as congress intended it should be enforced.

"Every day, in addition to keeping out aliens seeking entry by illegal and devious methods, our immigration officers are faced with the task of examining probably 100,000 aliens seeking admittance thru the regular channels.

"The task is an enormous one, and for its successful accomplishment I feel that no expenditure of funds or personnel should be spared."

STATE FAIR VISITORS.

Miss Irene Dresbach, Grover Yates, I. P. Todd, Guy Stout, Elmer Hosler, L. S. Putnam and son, Wallace, Mr. and Mrs. N. L. Harmount, Donald Norman, Misses Avis and Martha Reid, George Hitler, Leonard Barthelmas, Charles Walters, Mrs. John Barthelmas and daughter, Miss Mildred, Mr. and Mrs. Harry Arledge, Mr. and Mrs. Ralph Kerns, W. C. Baum, Kenneth Moss, Millard Heffner, William Moss, Dwight Chilcote, Mr. and Mrs. N. F. Valentine and son, George, Mr. and Mrs. W. J. Wardell, Misses Alma and Dorothy M. Glick, John H. Sark, Judge E. A. Brown, Mrs. Florence Steele and daughters, Misses Evelyn and Grace, Miss Mary Wilder, Dr. Isa Carr, Miss Mabel Nothstine, Ed Kreisel, E. Omstead, Miss Juanita Barr and brother, Blue Barr, Mr. and Mrs. N. C. Allen and daughter, Miss Chloe Mrs. Gusta Lauer and daughter, Delores, Miss Erma Merriman, Mr. and Mrs. W. T. Hoskins and son, William, Mr. and Mrs. John Riggins and son, George and Harvey Adams attended the State fair today.

ABRAM F. MYERS

Abram F. Myers of Iowa has been given a recess appointment as a member of the federal trade commission. Mr. Myers succeeds Vernon W. Van Fleet, resigned. He is a Republican and has been senior attorney under the assistant to the attorney general in Washington. He has been in the Department of Justice for many years, rising from a minor clerical position.

CARRIERS' PICNIC

Robert Trimble, Robert Griffith, Herman Compton, William Goeller, Addison Seimer, Harold Beery, Ray Beery, Foster and Denton Elliott, carriers for the Dispatch, went to Columbus Wednesday and were guests of the Dispatch Printing company, at the State fair.

FOR DRUNKENNESS.

Deputies Irwin and Littleton, of the sheriff's department, placed Harvey Yount, a drunk, under arrest at The Pickaway Electric plant Tuesday evening. He was brought to this city and placed in jail. He appeared before Justice Friece and was given a fine of \$5 and costs, which he paid and was released.

Great Pageant at Valley Forge Anniversary

The historic field of Valley Forge, where the heroes of the Continental army passed a terrible winter, again stirred beneath the feet of soldiery commemorating the 148th anniversary of Washington's evacuation of the encampment. The pageant was held under the auspices of the sesquicentennial exposition. Photograph shows the Centennial Legion and all the other historic commands present assembling for a parade and review.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

Cambridge—A 10,000,000 cubic foot gas well brought in on the J. H. Me-haffey farm, near here making a total of 36,500,000 cubic feet of gas struck in the Cambridge gas field within three days.

Steubenville —John G. Belnap, who has filed a voluntary petition in bankruptcy in federal court at Columbus, is one of five men indicted for discrepancies said to have caused the Yorkville bank crash on May 15.

Canton —Failure of some of the witnesses subpoenaed to appear before the Stark county grand jury probing the murder of Don R. Mellett, editor, will not handicap the investigation continue unabated. Prosecutor C. B. McClintock declared today.

Columbus —The body of an unidentified woman who died in a hospital after she collapsed on the street here, was still unclaimed today. Her death was attributed to heart disease. Arrival of persons from out of town today is expected to make known the woman's name.

Akron —With the manufacture of 1,060,000 tires and 1,950,000 tubes during August, all tire and tube production records were believed to have been broken by the Goodyear Tire & Rubber company.

Marion —The plant, equipment and service stations of the Dependable Oil company, has been sold to the Pure Oil company, Columbus, it was announced here at a purchase price estimated at \$175,000.

Columbus —Four young boys ranging from 10 to 12 years, have been sentenced to the Lancaster Industrial School by Juvenile Court Judge Duncan, for robbing a physician's supply store.

Cleveland —William L. David, former attorney general of Ohio, has accepted an appointment as law director of Lakewood, a suburb.

BRIEFLY TOLD

—Mrs. Nelson Huston has rented her home on North Court street to Mrs. Jennie Steele and family. She will move to Columbus and will reside on Studer avenue, near her daughter, Mrs. Rolland Teegardin.

Or Have a Pennant Race.

Those Mexicans might relieve their feelings by pulling off a good bull fight.

THE GOVERNOR HAS ORDERED A "CLEANUP"

Bootlegging and Gambling in Lorain to be Hit—City Officials Haled in.

Mayor William F. Grall and City Solicitor Walter R. Harlan, of Lorain, were ordered Tuesday by Governor Donahey to clean up bootlegging and gambling in their city.

The executive order was issued while Police Chief Theodore Walker, of Lorain, was in conference with the governor and State Prohibition Commissioner McDonald, discussed law enforcement conditions in the city.

Chief Walker had been called in by the governor following a conference last week with Mayor Grall, at which time the governor is understood to have told the mayor of alleged conditions in the city and instructed him to "clean up."

At the conference Tuesday Chief Walker was confronted with the same evidence of bootlegging and gambling which was placed before Mayor Grall last week. It had been gathered by agents of Prohibition Commissioner McDonald.

LIQUOR RAID IN FAIRFIELD STILLS FOUND

Sheriff Roy McNaughten and Deputy Peters and Officer Chapman pulled off one of the largest liquor raids in Fairfield county Tuesday afternoon when they swooped down upon a corn field near Cedar Hill, arresting Oscar and Russell Young while they were operating two stills in a ravine.

Twenty-three gallon jugs filled with whisky, two stills and sixteen barrels of mash were brought in. The distillery was housed in a tent and the liquor was running hot from the stills when the officers arrived. A well had been drilled nearby for the convenience of getting water, while two acetylene tanks were used for lighting purposes; several hundred pounds of sugar and many empty jugs comprising the equipment were brought in.

He's Bound to Give Service.

Henry Ford is going to start a hemp farm so he can make tow ropes for his customers to use when they find a friend with a mere car.

Very Lady-Like in Comparison.

After all, those Chinese pirates are not yet quite so blood-thirsty as Chicago gangsters or Black-Hand bomb throwers.

SHOT IN FOOT.

George Lutz, 33, was shot in the right foot in a successful effort to escape from dry raiders who raided his place near the Rock House early Sunday. Later in the day he called the sheriff and surrendered. Twenty gallons of liquor were confiscated in the raid. Lutz was tried and acquitted of the fatal shooting of his brother-in-law, Bert Woods, in Lancaster three years ago.

BETHANY HOMECOMING.

The ninth annual homecoming of the Bethany M. E. church will be held Sunday, September 5. There will be a number of good speakers. Music will be furnished by Proximire's twelve piece orchestra, of Lancaster.

Come and bring your basket and enjoy the day.

AWARDED SECOND PREMIUM.

The Pickaway Dairy company, manufacturers of the famous Gold Bar brand of butter, was awarded second premium by State fair judges at Columbus Tuesday. Gold Bar scored 92 points. The record is 93 points, as neither creamery nor farm made butter is perfect.

J. M. HUDSON

The Illinois Chamber of Business has decided that "little business" needs attention as well as "big business," and hereafter will help the retailer. A new retail division has been created and J. M. Hudson, former secretary of the Bloomington Chamber of Commerce, put in charge with a salary of \$10,000 a year.

TRAINS TAKEN OFF.

Two trains on the "Sheepskin" road The Cincinnati & Muskingum Valley, have been taken off; the eastbound train due here at 10:10 a. m., and the westbound train due here at 5 o'clock have been abandoned. The only passenger trains are the 8:25 a. m. westbound and the 6:32 eastbound in the evening, which runs only to Lancaster.

That's Something Else.

The wets have been having a referendum, but it seems doubtful if they will be able to put over a recall.

Danger in Idleness

Wicked acts are accustomed to be done with impunity for the mere desire of occupation.—Aunolus.

ARGUMENT FOR AND AGAINST THE PRIMARY

Sufficient Names Secured and Voters Will be Asked to Make Decision.

Friends of the present primary election system came under the wire Tuesday night in time to have an official argument against the proposed amendment to repeal the primary system prepared and sent out by the secretary of state to voters.

After a day of telegraphing and telephoning, a committee of three to prepare the official argument was chosen. Speakers of the house of representatives Robert A. Taft, of Cincinnati, appointed Mayor Allen C. McDonald, Dayton and Representative J. H. T. Gordon of Logan county, while Lieutenant Governor Charles H. Lewis appointed Senator John S. Edwards of Licking county. Mr. Taft telegraphed his appointments from Canada, where he is on a vacation.

The committee has until Thursday to prepare and file its official argument. The committee sponsoring the amendment will file the argument on Thursday.

That the petitions initiating the amendment will be sufficient to insure the amendment being submitted to the voters at the November election appears certain. Most of the local county election boards have certified the petitions obtained in their counties back to the secretary of state with only a few signatures eliminated. Several thousand more signatures than are required.

REPUBLICAN BALLOTS CAST PRIMARY DAY

Total For Governor Was 478,000—Cooper's Majority Was Nearly 15,000.

Myers Y. Cooper, of Cincinnati, Republican nominee for governor, won in the primary election by a plurality of 14,957 votes over Secretary of State Brown, his closest competitor the official vote compiled Tuesday shows. The total vote cast for governor was approximately 478,000. Cooper's vote was 172,553 and Brown's 157,596.

United States Senator Willis was renominated by a plurality of 193,153 over Charles Q. Hildebrandt, Wilmington, the closest of his seven opponents. Willis received 249,281 votes to 56,028 for Hildebrandt.

Chief Justice Carrington, T. Marshall, unopposed for renomination received 273,313 votes, while Judges E. S. Matthias and Thomas A. Jones, seeking renomination, received 169,143 and 143,920 votes. Their opponents, C. G. Washburn, of Elyria, and Frank W. Geiger, of Springfield, received respectively 129,372 and 129,193 votes.

UNDERWENT OPERATION

Miss Mary Wilkinson, who has been ill at her home near Grove City underwent an operation for the removal of tonsils at the office of Dr. J. C. Sammers at Grove City. The operation was performed by Drs. Reibel and son of Columbus.

Some Need Thick Veil

For success has a great tendency to conceal and throw a veil over the evil deeds of men.—Demosthenes.

Not a Shot Wasted

Alfred Weston, a Scotch hunter, killed 97 birds with 97 shots on a recent shooting trip.

THE AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

LEGION CONVENTION PLANS ANNOUNCED

Arrangements have been completed for a great program of entertainment for the eighth annual national convention of the American Legion at Philadelphia on October 11 to 15, under the direction of the general committee on arrangements.

Among the things planned for the great gathering of thousands of Legion and Auxiliary members from all over the United States and several foreign lands, are:

A Legion ball in the Sesquicentennial auditorium, a military circus, the first world's baseball series for boys, fireworks displays, drum and band contests, with the best musical organizations in the Legion competing, the Legion parade, and a world's fair with millions of dollars' worth of displays and exhibits.

Music for the ball in the auditorium accommodating 20,000 persons will be furnished by two orchestras, a band and the \$150,000 exposition organ. Special efforts are being made to provide the sort of dances Legionnaires in various sections of the country enjoy. Suggestions may be sent to the American Legion Ball Committee, 301 City Center Building, Philadelphia.

Two thousand picked men will go through their trick military stunts for the pleasure of the convention throngs. Huge lights will shed a noontide brilliance on the scene.

Lighting will be one of the most spectacular features of this year's convention arrangements. At the convention grounds there will be a

Col. Edward J. Meehan.

light with a candle power of 6,300,000, said to be the most powerful ever contrived by man. Fourteen super-power searchlights will provide the concentration. At the entrance to the sesqui grounds will be a giant replica of the Liberty bell with 25,000 lights of 100 watts each, concentrated upon it. The bell, weighing 42 tons, is suspended from supports 70 feet high.

For the first time the Legion's All-American junior world series will be played at the convention. Four teams, representing four regions into which the country has been divided, will play in the municipal stadium. These games are the culmination of a nation-wide sequence of contests in which champions have been chosen to represent their cities, their districts, their states and their regions.

Arrangements for the convention have been in charge of National Vice Commander Vincent A. Carroll of Philadelphia, who is chairman of the convention committee. E. E. Hollenback and H. Harrison Smith are vice chairmen.

Edward J. Meehan, lieutenant colonel in reserve, is executive secretary of the convention committee. Upon him devolves a very large part of the practical details of staging the convention.

Colonel Meehan, who holds the Distinguished Service Cross and the Croix de Guerre for his World War services, is a native Philadelphian. He served with the One Hundred Ninth Infantry in the Twenty-eighth division overseas. He wears two wound stripes from that service.

When the Paris caucus set in motion the activity which resulted in the formation of the American Legion, Colonel Meehan was present as a representative of his division. Returning to Philadelphia, he affiliated with one of the first posts organized.

Take No Cars to France

Legionnaires who make the great pilgrimage with the organization to France in September, 1927, will be advised by the National France convention committee of the Legion against taking automobiles with them, the cost being estimated in the neighborhood of \$500. It will be cheaper to buy a car in France, then sell it before returning, or, better still, to rent a car there. A question of space also enters into the matter.

TREES OR CATTLE FORESTERS RULE

Woodland Pasture Worth Very Little; Grazed Portions Dry Out and Die.

Ohio farmers must choose between cattle and trees.

Landowners generally agree that the typical farm woodland makes very little pasture, E. W. Dean, extension forester at the Ohio Agricultural Station, Wooster, says. For strictly pasture purposes it is only worth about 25 to 30 cents an acre on a money basis.

The woodland is just a place the stock may seek protection from the sun and flies on hot summer days.

They roam through the lot eating the scattered tufts of grass that grow in the sunny spots. On the way they also eat any seedlings that come their way.

Scarcity of forage in the woods keeps the cattle constantly on the move. Eventually this continual trampling will pack the forest soil, allow the leaf litter or mulch to dry out and in time blow away. This defeats the purpose of the mulch.

Once this mulch is removed, the woods attain an unhealthy condition.

Openings will occur, small seedlings and trees of sapling size die out, and the older trees become stag-headed. Such a non-timber producing forest, the re-

sult of grazing is still a very poor pasture.

Grasses that grow in the shade, continues Mr. Dean, are considerably less palatable and nutritive than those that grow in the open exposed to direct sunlight.

RED MEN

Held Interesting Meeting and Banquet at Their Wigwam Saturday Night.

Congo Tribe No. 51, Improved Order of Red Men, had one of the most interesting meetings ever held in these hunting grounds when the famous team of Deerfoot tribe of Columbus, paid them a visit last Saturday evening.

There were about 150 Red Men present when the Warrior's degree was given to the large class of pale-faces who were from these hunting grounds and those of Washington C. H. Past Great Sachem, L. E. Miller, presided. Visitors were present from the hunting grounds of Lancaster, Gibsonville, Adelphi, Tucson, Hilliards, Linden Heights, Chillicothe, Waverly, Piketon, Washington C. H. and Dayton.

Long talks were made by Great Junior Sagamore John Downing, of Piketon; Past Great Sachem E. C. Wilcox, of Dayton, and Past Sachems N. S. Cook of Deerfoot tribe, C. C. Metzger of Logan tribe of Chillicothe and N. G. Spangler, of Tucson tribe. After the long talks the brothers enjoyed an excellent banquet.

A WORD OF COMFORT.

The best ministrants of the mercy and pity of God are those who are consciously his beneficiaries. Only he who has received can give; we reflect that we have. Yea, so as we are recipients of his strength, we become channels through which greater love than we knew had been ours flows out to others to sustain them in their hours of grief and loneliness.

Because you have permitted God to comfort you, you become his instrument to bring power and peace to your fellows.—Frederick G. Budlong.

MILK is the best food for growing children. It contains all the food material needed for the proper development of their bodies. No other food can be used in its place, because no other food supplies equal nourishment and building material for muscle, bones and teeth. Children who may be under-weight, anaemic or otherwise delicately constituted, begin to thrive as soon as given a liberal allowance of pure rich milk.

If you would see your children grow sturdy and smiling, with sparkling eyes, rosy, dimpled cheeks, firm flesh and a sound, untroubled stomach—use scientifically pasteurized milk.

OUR PASTEURIZED MILK Comes from selected farms

It is hygienically handled from the moment it reaches the light of day until it is delivered to you. It is scientifically pasteurized and bottled by the most sanitary method. The bottles are washed, scalded and sterilized with live steam before being filled.

It costs you no more to be safe than unsafe. Take no chances with milk for your children. Just phone your order to us and service will begin at once.

THE FIRST NATIONAL BANK
CIRCLEVILLE, OHIO
"The Bank That Makes You Feel At Home."

Two-Piece Frock Shown in Contrasting Colors

The fashionable two-piece frock is being shown this summer in contrasting colored skirt and blouse. White skirts with gay-colored blouses and blousing combinations of many of the smart shops. Marceline Day, motion picture actress, in "The Boy Friend," is shown wearing a frock of gray and Kelly green.

Shaped Bodice, Tunic

Worn by Paris Bathers

There is evident in the newest bathing suits an inclination to define the figure with a slightly shaped bodice or tunic, and to give a little fullness to the skirt, however short, says a Paris fashion correspondent. This is done usually with an inverted plait at each side, in some models of crepe or in taffeta a cluster of gathers.

The head covering for bathing and the beach is uncommonly attractive this season. A few smart little shapes in leather, rubberized material and silk are shown for women who dress more for the sun bath and beach promenade than for swimming, all of them in pretty flower colors. Soft, floppy little hats of cretonne and other figured cotton are pretty and popular. But the bathing caps most in demand fit the head simply, wound in the manner of a turban or kerchief, with a snappy bow in front, at the back or at one side. Most practical of all are the aviator caps that cover the hair and ears and fasten with a strap under the chin.

Tights, Fancy Garters

Are Popular Fashions

The fancy garter which rather vulgarly came into popularity with the short skirt is not being abandoned by well-dressed women of refinement even in the younger and more active sets.

Tights which have feet and therefore are also fitted to serve the purpose of stockings are being worn by those who can afford them. The majority who, of course cannot, are supporting their stockings wholly from the waist and are wearing tights to below the knee. But they cling to fancy garters, useless though they be.

The one-piece stockings and tights idea is of course from Paris. In very expensive garments, clocks are embroidered and an elastic garter, which becomes a part of the garment, is inset above the knee, but it contains no rubber, it is merely a tightly woven section like the tops of some socks for men.

Fobs Back in New Guise;

Suspended From Bar Pin

Fobs have come back, but in a new guise. The new fob is suspended from a bar pin, usually of rhinestones.

A fob of grosgrain ribbon hanging from a bar of rhinestones attached to the breast pocket of the tailored suit adds a smart tone to the costume. But fobs are also worn with dressy afternoon frocks, and for this purpose they are of crystal in white or combined with colored stones.

For the popular black and white costume there are fobs of white crystals with the bar in onyx, closely set with rhinestones. With an afternoon dress the fob is worn on the left side a little below the shoulder.

Summer Hosiery of Lisle

Many of the smartest women are wearing lisle hosiery in the most delicate colors and in a weight almost as sheer as chiffon silk stockings. The colors are exactly the tones which are considered the most correct in lisle hosiery.

Gold Broche Underdress

An underdress of gold broche is trimmed with gold buttons down the front, and shows beneath a long sleeved overdress of orange crepe- trimmed with leopard, and fastened with a gold bow at the neck, and a gold ornament at the low waistline.

HISTORY OF THE BANJO

Fred J. Bacon, the silver bell banjo king, will be the crowning feature at WAHG Labor Day night at half past nine. Mr. Bacon is known throughout the banjo world as a composer as well as the premier performer. Says Mr. Bacon, "The five string banjo is not of Negro origin as many people suppose, but was the invention of Joel Sweeney, an Irishman who lived in Richmond, Virginia. Down in the Old Dominion state Sweeney made his first banjo in 1845 and since that time millions and millions of all sorts of banjos have been manufactured from the crude contraption made in the cabins of the slave quarters of Dixieland up to the instruments now sold for seven hundred to a thousand dollars.

The instrument I will use at WAHG is worth a thousand dollars and some of the selections

this banjo will radiate from the Grebe station include a variant of my own built around Stephen Foster's Old Black Joe. Then to show that the five string banjo will translate classic music I will play Beethoven's Minuet in G. I will also program one of my own compositions, The Silver Bell March. My wife, Cassie M. Bacon, who is truly a great ukulele virtuoso, will assist me in this WAHG program by presenting ukulele solos such as Gypsy Love Song; Let Me Call You Sweetheart; Carry Me Back To Old Virginia and a novelty selection—The Ukulele Band—in strumming style."

Birdlime From Berries

Holly berries are valuable for making birdlime. Common birdlime can be made from linseed oil, but the quality made from holly is infinitely superior.

Wholly American

The production of maple sugar and maple syrup is purely an American industry. Canada being the only country other than the United States where they are made.

MANSFIELD TRUCK- ERS ORGANIZED

Walter Marion, Democratic candidate for Representative and a prime mover in the local Truck Growers' Association, returned home from Mansfield, O., where on Monday he succeeded in organizing an association.

The truckers of that city are up against stiff opposition, in that the Reformatory has a farm leased for trucking and aside from what is used in the institution, which is raised by convict labor, the institution disposes of in the open market of the city.

Mr. Marion and his brothers, William H. and George, has revolutionized trucking in this section of the State with their immense green-houses.

But Did He Know It?

Another thing old Job escaped, and it may have helped him to be patient, was experimental serum treatment.—Ohio State Journal

The Battle Is Now On

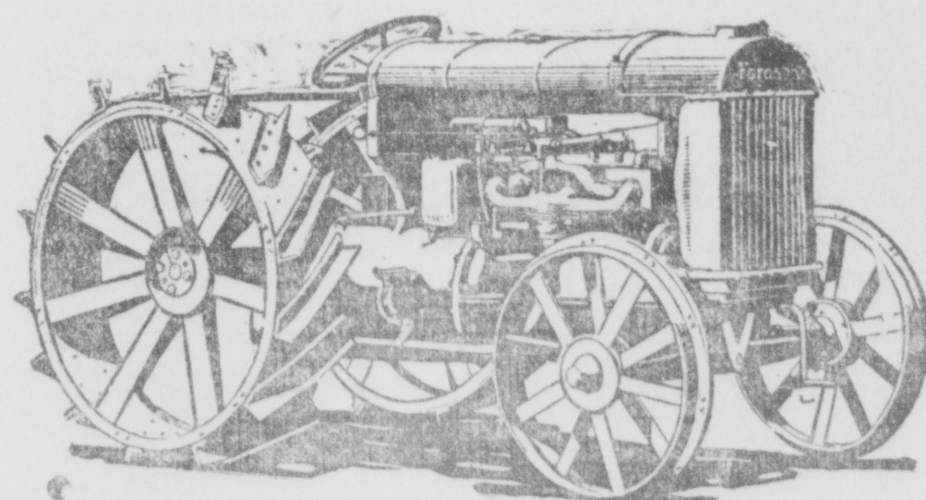

For 50 years in business, I have constantly named lower prices for reliable merchandise than my competitors—I am now better prepared than ever to name low prices---All I ask is an inspection of my stock and learn my prices---Have never been undersold. See my windows for prices.

Forest Rangers Learn

Tricks of Lightning

Lightning plays no favorites. It picks on spruce, pine, fir, cottonwood, hemlock—anything. It plays more often over some parts of the hills than others; it will hit the same tree several times.

On the hill where I live there isn't a tree of an age of 200 years that does not show lightning scars, and the almost human manner in which such trees heal their wounds is a marvelous revelation.

Lightning, when it strikes a vital, maturing tree, leaves no burning path; but when a dead snag or a devitalized tree is struck there is imminent danger that in the groove left by the stroke a bit of pitch or tinder will ignite and cause the tree to smolder and throw off a large quantity of smoke. This generally rises in spirals straight up from the forest and expert observers become so clever that they easily tell that kind of fire and so notify the ranger of what he may expect before he sets out.—Saturday Evening Post.

PERSONALS

Mrs. H. M. Steyers, of Cleveland, is the guest of Mr. and Mrs. Will McCrady.

Charles Diehlman and son, Charles Jr., spent the day at the State fair Columbus.

Junior Funk and Junior Dresbach attended the State fair in Columbus today.

Carl and Mary Virginia Seyfert, of Cleveland, are guests of their grandmother, Mrs. M. C. Seyfert.

Mr. and Mrs. Meeker Terwilliger left today for a visit to Philadelphia, Atlantic City, Baltimore and Washington D. C.

Mrs. Murray Oglesby and daughter, Kathryn, of London, are guests of her sisters, Mrs. H. C. Renick and Mrs. Maude Davis.

Miss Lillian Van Heyde, of East Cleveland, is the guest of Mrs. Ella Crites and Mr. and Mrs. Elliott Crites of East Main street.

Reber Dills, of Dayton, who has been visiting his grandmother, Mrs. Lewis Stribling, of North Washington street, has returned home.

Mr. and Mrs. Seward Folsom and son, Thomas, who have been guests of his parents, Mr. and Mrs. H. P. Folsom, have returned to their home at Lima.

Mrs. H. E. Betz and daughter, Mrs. Wayne Leist, spent the day at the State fair. Mrs. Betz will remain for a visit with her daughter, Mrs. Lester Flora.

Captain O. H. Spencer went to Columbus to attend a reunion of the First Brigade of the first division of the seventeenth regiment of the army of the Tennessee which met at the Memorial hall.

Mrs. Bertha Stewart and Mrs. Omer Lemmings, of Williamsport, went to Columbus Wednesday where they visited the latter's husband, the former's brother at Grant hospital. He underwent an operation for rupture Tuesday.

Mr. and Mrs. George Wertman and son, Kenneth, and daughter, Miss Mildred, Noah Bolender and son, John, and daughter, Miss Nellie, returned Tuesday from a two weeks' motor trip. They visited Niagara Falls, New York City, Boston, Philadelphia, Washington and Baltimore.

A. E. F. Paper Valued Now

Complete sets of the Stars and Stripes, the weekly paper issued by the American expeditionary forces during the war, are now priced at \$5.00. At least this is the price fixed by Putnam's, who recently offered a set for sale. It is possible that in a year or so the price will be advanced. The publication enjoyed a large sale, the peak circulation being 529,080 copies.

A Bored Bird

"Hello!" said the Chestnut to the Robin. "What are you?" "I'm a little bird," said the Robin. "What are you?" "I'm a little burred, too," said the Chestnut.

Sport Licenses

American hunters and anglers took out more than 5,000,000 licenses during the season 1924-25. The returns to state treasuries amounted to more than \$6,400,000.

COMMON COLD IS IN FOR BATTLE

Joint Action of Many Sciences Proposed to War on Disease.

New York.—Medical men and fundamental scientists are asked to co-operate in a determined effort to conquer the common cold, which is said to be the most persistent and harmful enemy of mankind, causing more deaths and greater economic waste than any other disease.

The joint attack was suggested by Francis P. Garvin, president of the Chemical Foundation, in a recent address before the American Drug Manufacturers' association, in which he urged that body to bring together physician, pharmacologist, chemist, bacteriologist and pathologist for the purpose of making a co-ordinated study of the common cold and formulating a cure for it. The Drug Manufacturers' association has appointed a committee to co-operate with the Chemical Foundation in instituting the work of research planned.

As in the days of war, scientists in all fields will be asked to pool their knowledge and resources in an exhaustive investigation of the evil to be fought. Each will contribute his share in close co-ordination with the others. In this way all the aspects of the disease will be covered and what is now a scourge may yield to the common attack of experts and cease to be a blight on human health and happiness.

Colleges Will Help.

The 7,000 hospitals and the 400 universities in this country will be asked to become partners in the undertaking. They will become Pasteur institutes to study the nature of the cold and to use the facilities of their laboratories in such a way as to make each supplement the work of the others. Hospital and laboratory work of this kind will be supported from a common fund to be created for that purpose.

There will be no difficulty in raising the fund, Mr. Garvin thinks. The main task, according to him, is to lead the public to see the stupendous waste in physical energy and economic productivity which the common cold causes, and induce organizations already existing and amply equipped to merge themselves in a collective endeavor.

In Mr. Garvin's opinion the resources of the whole domain of fundamental sciences are needed to achieve victory. As all sciences overlap, the task of conquering disease is no longer that of the physician alone, but of the chemist, the physiologist, the pharmacologist and the bacteriologist as well. The common cold is a disease that demands the co-operation of all these scientists. It challenges, likewise, the employer, the business man and the parent.

Other Ills Have Yielded.

The pooling of the resources of all the sciences involved, Mr. Garvin believes, can be depended on to accomplish against colds what similar cooperation has accomplished against other diseases. Scarlet fever, smallpox, tuberculosis, hookworm, yellow fever, diphtheria, typhoid fever and diabetes have thus been subdued. Intelligent interest on the part of the public in any struggle of this sort for human well-being is a requisite of success.

The whole human race is weakened by the common cold. The expectant mother is affected by it and transmits its influence to the child. Because the common cold is regarded as an unavoidable disease, people are inclined to pay little attention to it, though the need to fight it is as urgent as if it were a disease with a terrifying name.

More than half of the expenditure of the hospitals of the country goes toward combating the effects of the common cold. From 60 to 80 per cent of the physician's practice deals with ailments attributable to the same cause. The lion's share of the nation's \$700,000,000 drug bill is spent for cold remedies. Of this amount three-fifths is paid for patent medicines alone, most of which are sold as cold alleviators.

There are said to be 45,000 drug items on the market, most of them supposed remedies against the common cold or its effects. Thirty years ago there were 2,700 items on the drug list, all told. The fact that there are so many "remedies" against the cold would seem to indicate that some of them are not remedies at all.

An Enemy of Health.

According to figures available, the ravages of the common cold are far beyond anything imagined by those who suffer from the disease without paying much attention to it. It compels every man, woman and child to abstain from work for several days every year—some estimates run as high as seven days. It pays the way for other diseases. It imperils and causes the postponement of surgical operations.

During the influenza epidemic all such operations, except in emergency, were delayed two weeks in all the hospitals in the city. This was due to the fear of post-operative pneumonia, which develops after an operation and spreads through a ward rapidly. Ninety per cent of child mortality is due to colds.

The waste caused by common colds in the basically important industries is enormous. Besides suffering direct loss in productivity, these industries are obliged to maintain expensive medical departments, employ large staffs of health workers and engage safety directors to attend to cases

that are the outgrowth of colds. They could afford to pay large sums to eliminate or reduce the loss thus entailed.

Considerable work has been done toward ascertaining the nature of the disease. The bacteriologists have spent years in laborious investigation. The medical profession made an exhaustive study of respiratory diseases during the war. The United States public health service, numerous health committees and local health departments as well as insurance companies have contributed to the purely statistical presentation of the problem.

Cause Still a Mystery.

In spite of all attempts to determine the specific cause of the common cold, the cause remains unknown. A cold, as the doctors explain it, is a catarrhal inflammation of the lining of the nose, mouth and throat. It is held by some to be due to infection with some peculiar germ which as yet has not been found. Some think that this micro-organism is so small that it cannot be detected even by the most delicate instrument. At various times various bacteria have been thought to be the cause of colds, but no definite organism has yet been chosen to bear the blame. Medical authorities generally are not quite agreed as to the bacterial origin of the disease. Evidence is still being collected and weighed.

Others think that the cold is due to chilling, wet feet, wet clothing, exposure, drafts, etc. But people who live in the colder regions of the earth seldom suffer from colds. Eskimos are not subject to coughs and colds, even when exposed to dampness and drafts. They often fall ill, however, after visiting a ship.

Colds are most common in the temperate zone. In this country few persons are immune from them. Not more than fifteen out of every hundred are lucky enough to escape with only one cold a year. The ailment is most frequent in early childhood and least frequent after middle life.

According to Dr. A. R. Dochez of the Presbyterian hospital, who is doing special research in the field, the cold, in itself, is of comparatively little importance. Its chief harm lies in the fact that it predisposes the patient to more serious diseases, such as measles, typhoid fever, scarlet fever and lobar pneumonia.

How Chemists Can Help.

Chemistry, Doctor Dochez said, can contribute to the fight against the common cold by inventing some antiseptic to be used locally to shorten the life of the bacteria or stop the development of the induced disease.

The aid which chemistry is in a position to lend the physician grows in scope almost daily. In many instances it has made the very progress of medicine possible. Ether, discovered in the thirteenth century, began to be utilized as an anesthetic five centuries later. Magnesium sulphate, used for relieving lockjaw, burns, strychnine poisoning, etc., was recognized by medicine only after two centuries. The medicinal properties of amylnitrite became known to the physician 23 years after its discovery by the chemist.

Thus, humanity has continued to suffer unnecessarily because physician, chemist and pharmacologist were not brought together to work out a problem none of them could solve separately.

The complex ailments of the body cannot now be treated by one class of scientists alone. Other groups must take a hand in the work, the labors of all to be co-ordinated and unified.

It will be the duty of the new body sponsored by Mr. Garvin to create the conditions necessary for co-operative research into the nature and the cure of the common cold and other ailments.

Dad Deserts Family of Twelve as "Lesson"

Indianapolis, Ind.—Owen Marcum, held in the Marion county jail as a fugitive from Seattle authorities, is just giving his family a little lesson in self-denial, he explains.

Marcum admitted leaving his wife and eleven children, but said he was just teaching them a lesson and sought to make his wife realize just how much she needed him.

Arrested at the home of his father, John R. Marcum, near Lawrence, Marcum said he is ready to go home, but indicated there was some question of a widow in California with nine children with whom authorities were attempting to connect him. The sending of money to the widow of nine to enable her to come from California is being investigated.

"I didn't intend to desert my wife; I only wanted to stay away long enough for her to realize how much she needed me," Marcum said.

Men Without a Country Total 1,000,000 in U. S.

Washington.—The "men without a country" of book fame would have plenty of company were he to set foot on American shores.

More than 1,000,000 persons in the United States, or approximately 1 per cent of the total population, are in the same fix, and most of them don't know it.

This revelation is made by Harry E. Hull, commissioner of immigration. The commissioner explains that this total of "outcasts" has been created largely by aliens who have overstayed their temporary entries and by tourists who, en route to some other country, stopped off here, found a job, and settled down. Many also came over the borders when restrictions were less rigid, lost their original citizenship by remaining here too long and then forgot or ignored American citizenship requirements.

Take Time to Consider

Give not reins to your inflamed passions; take time and a little delay; impetuosity manages all things badly.—Statius.

Making Traveling Easy

If they make motor buses much longer, passengers will be able to reach their destinations by merely stepping over the seats.

Train Mind Properly

Painful and disagreeable ideas vanish from the mind that can fix its attention upon any subject.—Zimmerman.

The Way to Read

Try to believe that he means something, search lovingly what that may be.—Carlyle.

AMUSEMENTS

A Zane Gray story picturized by Paramount with absolute fidelity and authenticity, with one of the most notable stellar and supporting casts in screen history and acclaimed by reviewers as one of the most entertaining and thrilling Gray stories to date comes to the Met theater for an engagement of two days starting Wednesday.

"Desert Gold," concerns itself chiefly with the lawless days at the close of the last century, along the southwestern border. Into this seething whirlpool comes the son of a rich man and there he encounters a girl. With her he escapes from bandits into the Painted Desert and amid wild rides, fights and adventures, finds love and gold.

Robert Frazer plays the role of the son of wealth and Shirley Mason that of Mercedes, the Spanish girl. Neil Hamilton is seen as Lieutenant Thorne of the United States cavalry and William Powell as Landree, bandit and killer.

The supporting cast numbers in its personnel George Rigas, remembered for his excellent work in "The Wanderer," and Frank Lackteen who scored as a half-breed Indian in "The Pony Express."

The picture was directed by George B. Seitz and supervised by Lucien Hubbard of "The Vanishing American" fame.

EDWARD HIMROD

Former Resident of Circleville Passed Away at His Home in Florida.

Edward Himrod died Monday morning at 6 o'clock at his home in Wauchula, Florida, from the effects of paralysis, aged 75 years. He is survived by his wife and the following children; Mrs. E. S. Stephens, George and Ralph Himrod, of this city; John Turney, Charles Himrod, Mrs. George K. Smith and Mrs. Luther Bostwick, of Wauchula.

His eldest son, John, wife and son, who had been here on a short visit enroute from Colorado, had just left for home an hour before the telegram of his death arrived. One sister, Mrs. Gus O'weiler, of Springfield, also survives.

Deceased was a former resident of this city, being a member of the police department some years since.

Plain on the Face of It

"What makes you think she is an impressionist?" "Her complexion."

All the Good It Does

"I argued with the cop, and—" "No, you didn't. It isn't done. You mean you argued at the cop."

She Proved It

Freddie—Gee, but you're contradictory today.
Flo—I certainly am not.

Would Never Do

"Do you always keep a-smiling at your daily work?"
"Nope, wouldn't pay. I'm a dentist."

YANKEE BEGGARS RAISE STANDARDS

Native Wit Makes Mooching a Science as Other Countries Bar It.

New York.—"Alms, alms, for the love of Allah!" has resounded throughout Palestine since Mohammed first went to Mecca; but if the authorities in Jerusalem have anything to do with it, it will no longer din in the ears of the tourist. For Jerusalem has turned thumbs down on begging and the picturesque and nondescript loafers who heretofore importuned the faithful and the unfaithful alike must seek other fields where their solicitations have not aroused the authorities against them.

Spain has also notified the beggars that, starting immediately, they are to become useful citizens. A round-up is now in progress and those of the aristocracy of alms who are too proud to work will be sent to the workhouses. The rest will be given opportunities to learn trades, and the minors will be taught to read and write.

Hamburg, so the authorities say, has solved its problem. When a "stemmer," "moocher" or "panhandler" accosts the stranger on the street, he is handed a ticket which permits him to have his case investigated by a welfare society. If he is found worthy, he is taken care of. If the society decides against him, he is advised to hustle for a job or leave town.

In Hull, England, the city corporation has taken somewhat novel steps to eliminate blind beggars from the streets. It has decided to pension them. Those who now enjoy a pension will have it increased to 25 shillings a week, while those who have no allowance whatsoever will find themselves on the city's payroll for a like amount. The city estimates that this scheme will cost in the neighborhood of \$30,000 a year.

Age-Old Problem.

Begging is coeval with history, and every nation and people has had this age-old problem to solve. When corn and wine were plentiful in the land, the gates of Rome were lined with the indigent and shiftless, who called on all the gods to witness their singular and collective ailments and misfortunes as they asked the stranger approaching the City of the Seven Hills for a few spare coppers.

When famine swept through the provinces, recruits flocked to the thinning army at the gates and swelled its ranks. Their argument was that if there be plenty in the land, those who have should give from their abundance to those who have not; and if there be famine, those who have should give all the more to those who have not. Rome, drawing on the richness of the conquered territories, opened its coffers and handed out doles to the city's bums, and more bums flocked to the city.

Jerusalem, in the days of the kings and the prophets, had its lepers and its loafers stretched out in the sun at the walls of the city. There they begged and blessed and cursed the opulent traders coming in from Egypt, Syria and other points, in successive breaths, according as they gave or did not give.

Begging thrived in the Middle Ages. There was an aristocracy of loafers whose fathers before them for generations had been loafers. They raised large families in rags and squalor to the glory of beggandom, and the mendicants went begging down through the ages in sunshine and storm, in summer's heat and winter's cold, at palace door and prison gate, Paris, the home of social graces, had its hordes of unwashed unfortunates. London had its quota of loafers. Berlin had its army of bums and Petrograd had its percentage of paupers.

Scarce in Colonial Days. Just when the advance guard of this ancient army established itself in America is uncertain. During Colonial times begging was practically unheard of. Even after the Revolutionary war there is little or no mention of mendicancy. There were abolitionists and whiskey rebels, but no bums, as such. In 1923 it was estimated that there were 12,000 beggars in New York city. In 1926 this number, it has been said, was reduced to 4,000.

This latter number, however, seems to be a snap estimate, or else there are times when the entire corps is working one particular section at the same hour. Many of these are crippled; but a fair proportion of them are able, although not willing, to get out on the argumentative end of a pick or shovel.

The American beggar has raised the art of mooching to the science of "stemming" and he is constantly improving on his practice in the most effective way of separating a few coins from the pockets of the sympathetic. The novice starts in on the less frequented streets. There he approaches each and every person that comes within his range. As he becomes more proficient in his work, he sizes up his prospects, rejecting this one, classing that one as doubtful and putting the label "sucker, good for five cents up" on still another.

He Avoids the Police.

As he becomes more capable in wringing coins from reluctant pocket-books, he moves up toward the more frequented districts. During his apprenticeship he learns to smell a "bull" block away. This is the distinguishing mark of a good professional and cheap panhandler. The good professional will go out day after day, or

rather night after night, and collect from five to ten dollars in two or three hours stemming without coming into contact with the blunt-toed shoes of the detective bureau. The cheap panhandler, on the other hand, will frequently find himself answering embarrassing questions asked by a desk lieutenant through his sheer inability to weed out the "dicks" that wander up and down the streets.

One of the favorite approaches used by the professional beggar who is just below the top of his class is to prey on the sympathies of the populace with a hard-luck story. Some of these are masterpieces that would bring their authors a fat check from a number of the cheaper magazines if the raconteurs could but find time to write them down. If there is a flood in Ohio, the beggar is one of the unfortunate victims who has had his chattels, wife and children washed down the river. He assiduously studies the stories of the disasters as they appear in the newspapers until he has his locale oriented. Then he improvises details and adds tears until the listener hears the roar of the waters, the howls of the wind and the shrieks of the victims as they are borne through the night.

If there is a fire, his life savings have been burned up. His home has been wiped out. His family has been lost in the ruins. He escaped because he was working and came home only to find that all was lost. The money he took out of the bank, in crisp new hundred-dollar bills, to buy a little home was turned to ashes. Broken-hearted, penniless and without a friend in the world, he faces the bleak future to build up from the ashes a new life, etc. It is heartrending, even though it is not true, and only the ultra-hardened can listen through it all without digging down to relieve this unfortunate victim.

Earthquakes Help Some.

Earthquakes, wrecks at sea, railroad accidents, every disaster that visits the land, creates its hundreds of victims who were from several hundred to several thousand miles away from the catastrophe at the time it happened. As long as the story holds a good position in the newspapers, the vicarious victim laments in the ears of the hard-working citizenry. When the story passes from a half-column to a half-stick, the beggar begins to cast about for some other disaster on which to fasten himself.

If it happens to be a time when current events are particularly free from holocausts and calamities, he will go back to his old familiar snivel of "Mister, could you spare me a few cents for a cup of coffee? I ain't no beggar; but I'm broke, hungry and I can't get a job."

Some of the more enterprising, in lieu of a better idea, will mention that they have just been turned loose from a hospital and haven't been able to find a job that they are physically fit to take. Such a one played West Twelfth street, near the seventh avenue subway station steps, for the better part of a month. He approached one prospect four times in one week and became so well acquainted with him that he remarked on the pleasantness or unpleasantness of the weather whenever he saw the prospect coming up the subway stairs.

One of the favorite methods of approach for the professional beggar is the young man walking with the young girl. The moocher sizes them up at a distance. If they seem to be enjoying each other's society, he feels another twenty-five-cent piece jingling among the nickels and dimes in his pocket. If, on the other hand, they appear to be bored with each other, he realizes that his possibilities have been reduced to a dime and that his probabilities are not worth more than five cents.

Elderly persons, both male and female, are also made to order for the experienced stemmer. The middle-aged enjoy a rather high immunity. The beggar knows that these as a rule are hard "to make" and that less than one out of twenty will "come through," so he devotes his time and energy to the old and to the young, especially when the young are in love.

Americans Enjoy a Dip Where Jonah Quit Whale

Saida, Syria.—Swimming near the place where Jonah is supposed to have landed after his adventure with the whale is frowned upon by dwellers in the vicinity.

Only recently a party of Americans driving from Beirut to Saida found a particularly inviting stretch of sand on the Mediterranean near Saida.

"Let's have a swim here," proposed one of the party.

The Syrian guide looked horrified. "No swimming is allowed here," he said. "This is Nebi Yunis," he added with finality.

"What of it?" "This is the spot where Jonah landed."

"We are not afraid of whales," came back the chorus and, peeling off, the party went in. The water was fine.

"Seven-Eleven" Came

Detroit, Mich.—"Seven-eleven, come seven-eleven," entreated 17 craphshooters as they watched dominoes gallop across the green board. "Here I am," said Patrolman "711," otherwise William Kane, and he arrested them all for gambling. They later paid \$5 fines.

Quite Impartial

New York.—The police at Coney Island are quite impartial. If girls in bathing cannot wear one-piece suits, those in cabarets must be careful as to wearing less than that.

Says the Deacon

Old times were mighty good times, but the new times beat the old ones for puttin' new life and pep in you, and givin' you a healthy hustle on the road.—Atlanta Constitution.

REPAIRS CLOCKS AND WATCHES
William Albright, formerly of Washington township, has moved to 267 Watt street, Circleville, and is ready to repair clocks, watches, etc.

He hopes his many friends find him at his new residence and bring their work, also that others may know of his work and thereby help him, crippled as he is, to make a living.

We still do Dry Cleaning BARNHILL'S.

NOTICE.

The principal of the Circleville high school will be in his office all Tuesday and Wednesday, August 31 and September 1, to interview high school pupils about the courses of study. All those pupils wanting to purchase high school books should give the names of the books wanted to the principal of the above two days. Only those books asked for will be ordered. Many pupils purchase secondhand books from other pupils. This has confused us in knowing how many books to order. Give or telephone your order to the principal. No money is required until books arrive.

J. O. EAGLESON,
Superintendent of Schools.

One Way to Get Them

Little Bobby was absorbed in playing marbles with his childhood pal, Jack, on the front veranda. Presently his older sister, carrying a sliced juicy lemon, came out of the house. "Bobby," she interrupted, "stop your playing for a minute. I'm going to put some lemon juice on your face to take the freckles off." "Honest, will his freckles come off?" wide-eyed Jack questioned. Bobby's sister assured him they would. "Then," said Jack with a determined air, "I'm going to stay here and catch them when they fall off."

OVERLOADED TRUCK CAUSE OF TIRE WEAR

Truck Is Useful Implement on Most Farms

Overloading of trucks is the big cause of excessive tire wear. Perhaps no part of the truck is subjected to greater strain on overloads than the tires.

Where pneumatics are used this practice does as much damage to truck tires as a complete disregard of the rules of inflation. With regard to the latter subject, the tire manufacturer's instructions on inflation of truck tires should be observed consistently. Overinflation is, in most cases, as dangerous as underinflation.

Even braking is necessary to obtain maximum wear and tear. Assuming even pull, the proper place to make first adjustment is at the brake band or shoe, not at any other part of the mechanism. Regular inspection of brakes is necessary and an even contact of the band at all points is requisite in good adjustment. Uneven contact of brake bands is the cause of "chattering" when brakes are applied. Operators can obtain full details concerning brake adjustments from the vehicle manufacturer's book of instructions.

A severe shock, such as results in striking a curb, may spring the knuckle rod, thus throwing the front wheels out of proper adjustment. This results in hard steering and excessive wearing of tires, either solid or pneumatics. In a case which recently came to my attention an operator completely ruined a pair of pneumatic tires on a 50-mile drive after a slight accident.

The front wheels should not be lined up exactly parallel. The rod adjustments should produce a "toe-in" of one-fourth to one-half of an inch in the front wheels (see manufacturer's instructions for exact dimensions and method of making adjustment).

Lubrication of all steering gear connections, including steering knuckles, at regular intervals, is necessary. The majority of "hard steering" complaints are due to a lack of lubrication.

RED TO YELLOW CHANGE FOUGHT

Switch of Tail Light Is Opposed by Majority of A. A. A. Clubs.

Since the adjournment of the second national conference on street and highway safety, the American Automobile association has conducted a canvass of sentiment among its affiliated clubs as to the proposal made at the conference to change the tail lights of automobiles from red to yellow.

It develops, according to A. A. A. headquarters, that the motor clubs already heard from regarding this proposed innovation are against it, and take the position that such a change, applying to 20,000,000 motor vehicles would cause untold confusion on the highways and would inevitably tend to increase the toll of traffic accidents.

Rank and File Oppose.

This was practically the one proposition on which the A. A. A. took issue with the recommendations made by the committees of the Hoover conference and it was at the insistence of club executives that a decision on the tail light was postponed. All developments since the conference indicate, it is stated, that the rank and file of the motoring public stand by the resolution adopted at the time by the A. A. A. as follows:

"That the secretaries of clubs affiliated with the American Automobile association in convention assembled hereby condemn the proposed change as being detrimental to public safety and to the best interest of 20,000,000 motor vehicle owners."

Railways Want It.

Although no mention was made in the resolution of the forces urging the change, it was well known that the railroads and the motor clubs were on different sides of the fence on this important matter. Notice has been served by the A. A. A. that proper provision must be made for representation of the motorists before any committee that takes up this question for further study, as provided by the safety conference.

Little Gasoline Needed to Run Baby Automobile

A baby automobile, no longer than a man is high, pulled into Washington recently and sailed up to the capitol, the end of a transcontinental tour from San Francisco, says Popular Science Monthly. Its driver, Gus Petzel of Alameda, Calif., was also the designer of the sturdy little machine that scooted over mountains and deserts that bother cars five times its size.

It has a four-cylinder air-cooled motor, nine speeds, electric lights and starter, and is equipped with airplane tires. The wheel base measures 60 inches, and the car weighs only 560 pounds. It can make a speed of 80 miles an hour on the track, it is claimed, and 65 on the road. After reaching Washington the designer demonstrated that his unique little car could travel 52 miles on a gallon of gasoline.

New Air Pump for Tires

A relief from back and arm strain is the promise of the new foot pump shown in the illustration for compressing automobile tires, over the regulation hand-operated affair.

Easy to Pump Air With This Device. pump shown in the illustration for compressing automobile tires, over the regulation hand-operated affair.

Projections on Fenders Likely to Injure Tire

Be careful that a sharp turn of the front wheels does not bring the tire in contact with a spring fender or bumper. As the wheel turns this projection will quickly cut through the tread of the tire. When the car is heavily loaded there is danger that in passing over rough roads the tires will be bumped or gouged by projections on the fenders. Bent or broken fenders may also be in a position where they will gouge the tires. Inspect beneath the fender and make sure that there are no projections which could strike upon the tire. You may find bolts rubbed smooth and bright by continuous rubbing on the tires. If a change is made to oversize tires, be sure that there will be sufficient clearance between tire and fender when the car is loaded to capacity. This is, however, provided by most car manufacturers.

Important to Keep Your Automobile at Its Best

See that your oil-pressure gauge operates at all times. If no pressure is indicated, stop and have your trouble remedied at once.

Keep sufficient good cylinder oil in pan at all times.

See that the radiator is kept filled with water.

See that front wheels toe-in five-sixteenths of an inch at front. Wheels should be checked occasionally for alignment to avoid tire wear.

Keep your battery filled with distilled water.

See that your generator charges sufficient amperage at all times to avoid battery damage.

If motor does not start promptly when starter is pressed, get out and discover the cause.

See that springs are greased occasionally.

Before starting set spark lever about one-fourth up sector.

BEAT COAST TO COAST RECORD

L. B. Miller, driving a Wills Sainte Claire roadster lubricated with Pennzoil, pulled into New York at eleven twelve a. m., Friday, August 27th, having beaten the best previous coast-to-coast record by 3 hours and 8 minutes.

Miller left San Francisco at 9 p. m., Monday, August 23rd and completed the trip of 3,367 miles in a total elapsed time of 83 hours and 12 minutes.

During the entire run the oil was not changed and only 12 quarts of Pennzoil were consumed. This is an average of over 1,120 miles to the gallon in what is probably the stiffest test ever given a motor lubricant.

The best previous record of 86 hours and 20 minutes was established in June of this year by Ab. Jenkins and Ray Peck, driving a Studebaker, which was also lubricated with Pennzoil.

UNCONSCIOUS WOMAN REVIVED BY GARLIC

San Jose, Calif., Aug. 30.—(U.P.)—It remained for T. Castro to discover hidden potencies in common garlic.

When Castro's automobile collided with another machine, a woman passenger was knocked unconscious. Cold water was dashed into her face without effect.

Castro rushed to the tonneau of his machine, where a sack of fresh, succulent garlic lay. He waved one bulb under the unconscious woman's nose. She breathed deeply and sighed. He waved it again and her eyelids fluttered. With the third flourish she jumped up in full possession of her senses.

Red Wheel Makes Canning Easy

WITH the Lorain Oven Method of Canning you do not have to stand over a hot stove and stir and watch. You never have to worry about the "boiling point" or the "steam pressure". Fruits are canned right in the jars. There is no expensive canning equipment to buy. The Lorain Oven Heat Regulator measures the heat and automatically regulates the gas flame.

LORAIN OVEN HEAT REGULATOR

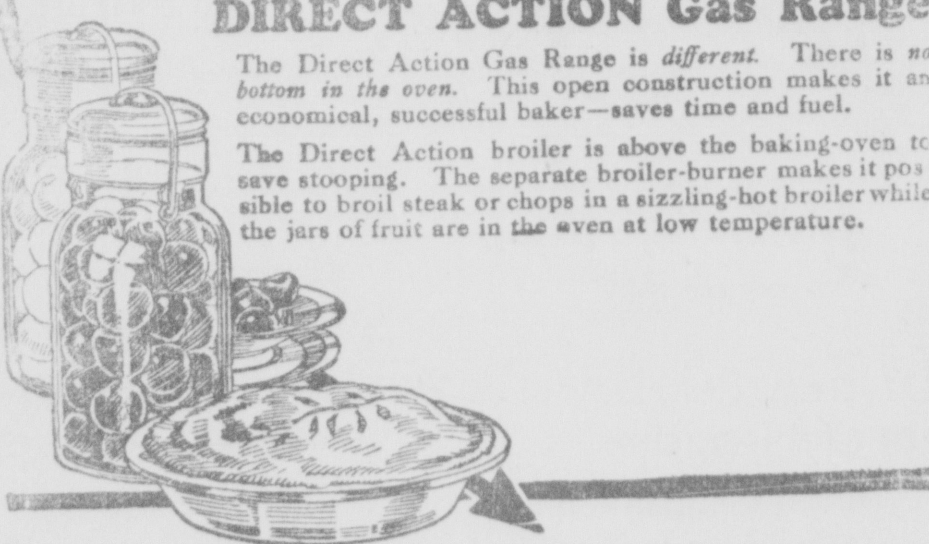

The Direct Action Gas Range with Lorain (Red Wheel) Regulator eliminates baking-failures and enables women to cook Whole Meals in the self-regulating oven while miles away.

Can your fruits by the easy Lorain Oven Method--and do all your baking by Time and Temperature in the Lorain-equipped oven of the

DIRECT ACTION Gas Range

The Direct Action Gas Range is different. There is no bottom in the oven. This open construction makes it an economical, successful baker--saves time and fuel.

The Direct Action broiler is above the baking-oven to save stooping. The separate broiler-burner makes it possible to broil steak or chops in a sizzling-hot broiler while the jars of fruit are in the oven at low temperature.

LIKE RISKING YOUR LIFE TO SAVE YOUR HAT!

Operating your automobile without public liability and property damage insurance is like risking your life to save your hat.

The greatest possible savings that you can make by neglecting to insure is the few dollars that a policy cost you.

Compare this with the big damage judgments that are being given today. The ten, twenty-five or even thirty-five thousand dollars that you might be forced to pay to an injured claimant, if you had an accident and no insurance!

It is worth while? To risk thousands, tens of thousands, possibly everything you own just to save the few cents a day that an automobile policy would cost you?

ROTOR SHIP RUNS ON "BLUE COAL"

Strange Vessel That Realizes Inventor's Boyhood Dreams Crosses Ocean.

New York.—When the little rotor ship Baden-Baden slowly sailed up the harbor recently, ending her voyage across the Atlantic, old shipmasters gazed in wonder. Was wind power, harnessed in a new way, to recover a place for itself on the sea? Since then the vessel, with its two revolving cylinders, has been making frequent trips and has become a familiar sight in the harbor.

Her inventor, Anton Flettner, visualizes the return of wind power to the seas. He has already adapted the rotor principle to several land uses that are interesting American business men, and is convinced that "blue coal," as he terms power derived from the wind, will be an important development of the future.

One of the largest automobile manufacturing companies in the country has installed rotor ventilators on some of its enclosed cars and is considering using the device on all its vehicles. Inquiries have come to Mr. Flettner from Arizona—his rotor windmill, it is thought, might be used for pumping water in irrigation projects and for electric generation. The inventor predicts the eventual replacement of the planes on airships by rotors. In addition, he is working out several other applications of rotors to industry. The development of the rotor ship the inventor regards as practically completed.

The invention of the rotor ship is the fulfillment of a vision that came long ago to Anton Flettner when, as a boy, he shipped on a sailing vessel to Australia to serve his sea apprenticeship.

His Sea Background.

Born in a small village near Frankfurt, Germany, he comes of a family of mariners and ship-owners—men who have sailed rivers as well as the high seas. His father was one of the first ship-owners to order steam tugs for river towing, thus replacing horses. After attending primary and high schools, Anton Flettner spent over a year and a half on the sea, with the intention of becoming an officer in the merchant marine. Color-blindness, however, made him give up the idea.

"My first trip was to Australia," he said. "The voyage, in a sailing vessel, was a long and tedious one. It took 122 days. At times the boat sailed briskly enough, but on other days we were in the doldrums—not a breath of air stirring. During the calm I used to wonder whether some device might not be found to make sails more efficient. The cheapness of wind-power was attractive."

After color-blindness had forced him to give up his ambition to become a mariner, he became a teacher of physics and mathematics in technical schools. At the outbreak of the war his technical knowledge brought him into army aviation, where he served as an advisory expert. One of his inventions, a rudder, was used on hundreds of airplanes. At the end of the war he adapted this rudder for use on ships. Several years ago work on the invention of a more efficient sailing vessel engrossed his attention.

First Attempts.

"My first endeavors in this line," Mr. Flettner relates, "were to substitute for the canvas sail a metal one, designed like the wings of an airplane. I soon decided, however, that the canvas sail, through hundreds of years of evolution, had been developed quite in accordance with the laws of aerodynamics and could not be bettered in any important way."

"I then decided to try other methods of utilizing the wind. My studies in physics had familiarized me with the Magnus law, discovered in 1852. In accordance with this law, certain wind pressures are set up by a revolving cylinder, and these I determined to utilize in my search for a more efficient propelling device. I called these revolving cylinders rotors."

Mr. Flettner says that he has found an erroneous conception among Americans, who suppose that the rotors are turned by the wind and thus operate the propeller at the stern. The true process is this:

The rotor is revolved by a small electric motor, thus setting up the desired wind currents—a vacuum area in front of it. As on the pressure area behind it. The rotor on the phantom ship described by Coleridge in "The Ancient Mariner," the air "Is cut away before and closes from behind." Ten times the propulsive force of sails of the same area is thus produced. The propeller at the stern of the ship is operated by an auxiliary motor, and is used when the wind fails or is insufficient.

Concerning the future of "blue coal" Mr. Flettner is very optimistic.

Bull Starts It

Pueblo, Colo.—"A bull in a china closet" burlesque was broken up by a police riot squad after a large bull appeared at a cafe door and charged across the room scattering tables, dishes and patrons.

Want Tougher Bill

Washington.—The life of the \$1 bill has decreased to six months and the bureau of standards "doctors" have been called into consultation.

LIGHTS USED

In Taking First Movies of Fights Made An Oven of Ring.

The first attempts at making motion pictures of prize-fights had ill effects on both spectators and fighters, according to an article by Robert Edgren in this week's Liberty. Describing one of the first fights to be photographed—the Jeffries-Sharkey bout, on November 3, 1899—Edgren writes:

"The motion-picture people had just discovered that pictures could be taken by artificial light. The photographing lights used today had not been invented. Instead, over the ring was a blazing square of hundreds of arc lights. When the fight began they were turned on, and immediately the ring and the area around it became an oven. Beside an intense glare, the lights threw down a withering heat. Long before the fight was over spectators were collapsing all around the ring."

In spite of the dizzying heat, Edgren points out, Jeffries and Sharkey, half-blinded by perspiration, fought twenty-five terrific rounds before the decision was given to Jeffries.

COST OF LORAIN TORNADO WAS ENORMOUS

Columbus, Aug. 30.—(U.P.)—Relief and rehabilitation work necessitated by the tornado that swept northern Ohio and devastated the city of Lorain on June 28, 1924, cost \$1,393,760.58, according to an audit made public today by Governor Donahey.

Relief disbursement, listed as family rehabilitation, totaled \$930,288.76. Amount spent for business rehabilitation was \$89,019.751.23. The state spent \$397,217.73 for maintaining the National Guard in Lorain, restoring public schools and other aids.

Contributions from individuals and organizations in Ohio totaled \$848,048.29.

WHOLESALE JAIL DELIVERY IN OLD KAINTUCK

Winchester, Ky., Aug. 30.—(U.P.)—Posses today were combing the hills near here following a jail delivery in which 15 prisoners were reported to have escaped.

The men escaped by sawing bars in a window on the ground floor. They fled between 2 and 3 a. m., it was said.

Three white men were among the fugitives: George Bowman, 22, sentenced to hang for attacking an orphan girl; Roy Martin, 24, Newport, Ky., and Mark Brewer, Cincinnati.

Danger of Typhoid in Vacation Season

The increase in the prevalence of typhoid fever is often directly proportional to the increase in touring by motor car, according to a statement issued by the Illinois department of public health.

In 1925, the disease spread into eight states from polluted drinking water of one small town in Indiana. Six cases in Illinois were traced to this source.

The motor car takes large numbers of people from their own protected community into others in which the sanitary conditions are not safe. Every person must take the responsibility for the safety of his own food and water at such a time.

The tourist season is open. It would be well for the public to remember that vaccination protects every one, while cleanliness and sanitation, equally protective, are not always practiced by others.—Hygeia Magazine.

Work of Saint Patrick

The appellation "the Apostle of Ireland" is sometimes given to Saint Patrick, who is supposed to have introduced Christianity into Ireland. He labored for 20 years among the Irish people, and, according to some of his biographers, founded 365 churches, baptized with his own hands 12,000 persons, and consecrated 450 bishops. The Irish, and English-speaking generally, observe March 17 as Saint Patrick's day.

Quite a Large "If"

It's a fact; you can read certain books and quote facts to astonish the guests if you don't mind being an ass.—Los Angeles Times.

Really Water Bugs

Electric light bugs are water bugs, the correct name of which is fish-killers. They come out of the water in early summer and fly in swarms at night, gathering about lights, and in some places so thronging the street lamps that they have become known as electric light bugs.

x HARTMAN THEATER. x
x x x x x x x x

Resplendent in its new dress—new and elaborate settings, new costumes, new effects, to say nothing of new songs, gags and comedy features, the fortieth edition of Al G. Field minstrels opens at the Hartman theater, Columbus, for the week commencing Monday, August 30.

The management this year terms the production, "The Fortieth Fete" in commemoration of the fortieth anniversary of this popular organization and the first part is a celebration of this eventful epoch of minstrelsy.

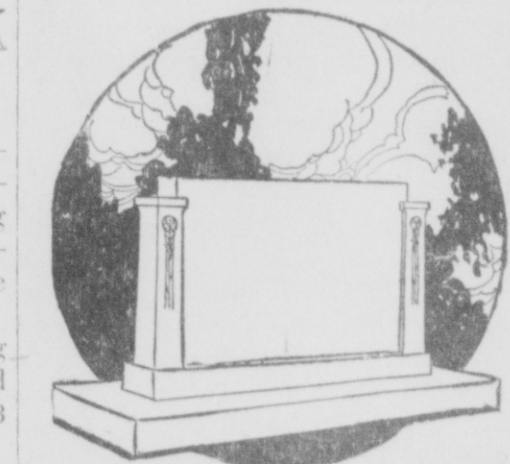

The fortieth annual edition will be presented with all the favorites who have helped for many years to build an enviable reputation for this company, the aim of which is to keep the spirit of old-time minstrelsy in the hearts of the people and in this they have been more than successful.

Blackface Eddie Ross with his African harp, is the principal funmaker. Jack Richards, the Welsh tenor, is at the head of the cast of singers. And there are Billy Church, Lloyd Gilbert, Dolf Kaston, Harry Frillman, Leslie Barry and a host of other good voices. Then there is John Healy with his inimitable "Old Black Joe," Harry Frankel, the big boy with the big voice a blackface comedian who has gained great favor with minstrel fans; Jack Kennedy, who received his training under George "Honey Boy" Evans, and a dozen nimblefooted dancers.

Old-time minstrelsy with modern trimmings is the backbone of this fortieth celebration and the semi-circle, the end men and all the characteristics of the old-time minstrel show have been kept in tact.

Seats go on sale next Thursday morning. Mail orders may be sent now. Matinees Wednesday, Thursday and Saturday.

MAKING A MONUMENT.

Even the plainest—is a more difficult task than one would suppose. It involves much thought, and perhaps many conferences, as to the design, the kind of stone, the lettering, and so forth. Then the work has to be done by skillful sculptors and others. But we always manage to give satisfaction.

THE WHOLE WORLD

Realizes today that all prosperity depends on the prosperity of the farmer—1925 was a better year than 1924 and 1926 will be still better. The farmer is represented by a majority of land owners and real dirt farmers in all legislative bodies—State or National. The great demand for food is increasing as the population grows. We can't exist without good, wholesome food and the farmer that produces what we eat must be properly compensated.

The sources of money supply are alive to the fact that money loaned on farm lands is safest. Rates on City property is usually 6½ per cent. We have unlimited money for the farmer at 5 per cent and 5½ per cent—10 and 20 years. You to select the loan that suits your purpose best. We have farms for sale that will pay you to own. A farm is the best basis of credit.

MOTORISTS FEAR HOLDUP; SPEED PAST DYING WOMAN

Body Is Found at Daylight, With Husband Injured and Exhausted as Result of Wreck.

Riverhead, L. I.—Robert Bertschy, manager of the Capitol theater at Riverhead, tried vainly to stop motorists at a bridge over the Long Island railroad tracks, three miles west of here, for several hours, as his wife lay dying under his wrecked automobile at the bottom of a 30-foot embankment. She was dead by the time help arrived.

Bertschy and his wife, Charlotte, were returning to their home in Riverhead from Smithtown, when, at 1:30 a. m. another car started to pass him on the right. Bertschy swung his car to the left and struck a fence, the automobile going over the embankment.

Bertschy was stunned and badly hurt. When he crawled out of the wreckage he heard the groans of his wife, pinned beneath the car, and he could not extricate her.

Bertschy saw an automobile approaching and with great difficulty struggled up the side of the embankment and waved to the motorist to stop. The motorist only put on speed and went past him. Bertschy then went back to console his wife, who continued to pray until she lost consciousness.

Weak and sore from cuts and bruises on his face and body and with his nose fractured, Bertschy several times climbed the embankment and sought to stop motorists, but all went by him, apparently fearing a holdup. Finally Bertschy fell beside the car, almost unconscious, and there he was found by a man at daylight. This man stopped a motorist and other help was summoned, but Mrs. Bertschy was dead.

SOCIAL CALENDAR

Mrs. Harry D. Jackson entertained her bridge club at her country home this afternoon.

Mrs. Mary Courtright and Miss Ellen Crites entertained Tuesday evening at their country home. The guests were Misses Jeannette Wenrich, Nettie and Clydia Steward, Bess Creager, Blanche Meyers, Mrs. Edgar Ritchie, of Amanda; Mrs. Clarice Hopkins, of Cleveland; Mrs. H. H. Creager and daughter, Nedra, of Toledo. Lunch was served.

Last Wednesday evening a jolly crowd of young people from Amanda, Circleville and Stoutsville visited the country home of Beryl Miesse near Stoutsville for the purpose of surprising him, it being his seventeenth birthday anniversary. They were very successful in surprising him and the evening was spent in playing games in house and on lawn. After refreshments were served all returned to their homes wishing Beryl many more returns of the day. Those present were Marie Miesse, Jeannett Hewetson, Florence Hoffman, Isabelle Gearhart, Margaret Belong, Mary Reigel, Elizabeth Crites, Mary Ellene Miesse, Marie Lump and Doyle Haas, Donald Alsbaugh, Warrick Van Cleve, Lloyd Blue, Lester Shupe, Herbert Roof, Merle Aldenderfer.

Mrs. Allen Sweepston entertained at her home Friday afternoon with a miscellaneous shower given in honor of Mrs. Ruth Dawson Dunkle. Those present were Mrs. N. A. Dunkle, Mrs. A. L. Maag, Mrs. John Carnes, Mrs. Herbert Adams, Mrs. William Richter, Mrs. Cyrus Haynes, Mrs. Raymond Hinton, Mrs. Elias Hinton, Mrs. Stella Dresbach, Mrs. Omar Hall, Mrs. John Dunkle, Mrs. Ralph Bowman, Mrs. C. A. Walters, Mrs. Miley Patterson, Mrs. Samuel Patterson, Mrs. Malvin Dawson, Mrs. Fred Metzger, Mrs. Belle Sweepston, Mrs. A. E. Cleary Mrs. Elias DeLong, Misses Helen, Mary and Lela Dresbach, Miss Hazel Karshner, Miss Ferne Hinton, Miss Josephine Dunkle, Miss Alice DeLong, Miss Lola Dawson, Miss Charlotte Dresbach, Miss Amy DeLong, Misses Marcella and June Adams, Miss Elizabeth Walters, Misses Mazie and Elizabeth Strawser and Mrs. Allen Sweepston. The afternoon was spent in music and social amusements. Mrs. Dunkle received many useful presents. Refreshments of ice cream, cake, iced tea and mints were served.

The first annual reunion of the Huffer family was held Sunday, August 29, at the beautiful country home of Mr. and Mrs. Charles Huffer on the Darbyville and Matville pike. Those who enjoyed the delightful affair were Mr. and Mrs. Ernest Hott and daughter, Justina and son, Lawrence, and grandchildren, Ernest and Helen Gardner, Mr. and Mrs. Charles Braskett and son, Scott, and daughter, Helen, and Daniel Huffer, all of Westerville; Mr. and Mrs. Webster Hill and sons, Harold and Gamala and daughter, Lena of Williamsport; Mr. Harry Huffer and sons, Clarence, Cleveland and Otis and daughter, Sadie, of Robtown; Mr. and Mrs. Thomas Huffer, Mr. and Mrs. Cleveland Huffer and sons, Woodrow and Charles Jr., and Ernest, Miss Stella Huffer, Mrs. Jesse Huffer, Mrs. Reba Easter and daughter, Eugena Maxine, and Mr. and Mrs. Delno Huffer, Mr. and Mrs. Frank Timmons, Lawrence Huffer and sons, Walter and Frank and Pete Cramblett, all of Darbyville. A sumptuous picnic dinner was served at the noon hour and a social good time was enjoyed. Ice cream and cake was served. The day was spent with music and games and all heartily hoping we will all be together this time next year.

Miss Eleanor Jones will entertain to bridge at her home next Monday evening honoring Mrs. John J. Corbett, of Detroit, Michigan.

Mrs. Lloyd Jones was hostess to her bridge club at her home Tuesday evening.

To Clean Up Our Stock Of

Summer Furniture

We offer the following goods at greatly reduced prices, subject to prior sale. In other words—First come, first served.

REFRIGERATORS

One large four-door side icer, holding 100 pounds of ice, without chipping, insulated with granulated cork, and lined with white porcelain. A wonderful refrigerator for country use that formerly sold for \$105. To close out, we will take \$79.80.

\$79.80

One large Leonard Cleanable Porcelain lined with ten-wall insulation, taking 75 pounds of ice without chipping (possibly 100 pounds), just the box for country or town use, priced at \$91.50 but will take \$69.54 rather than store it.

\$69.54

A dandy refrigerator for small family use is one with porcelain lining, fitted with porcelain lined water cooler, and having capacity for 50 pounds of ice (rated at 75 lbs.). This is another Leonard and has ten walls of insulation. Formerly priced at \$84.00, it is extremely low at \$59.

\$59.00

For those wishing a large medium priced box, we suggest one with white enamel lining, with same materials (in lesser quantities) than used in the highest priced Leonards, and with a capacity of 75 lbs. of ice (without chipping), we believe that this box, formerly selling at \$57.50, will not stay with us long when priced at \$43.70.

\$43.70

Just one top-icer in the lot. This one will hold 50 lbs. of ice without chipping and is lined with white enameled lining, and insulated with wool felt and asphalt felt. Formerly selling for \$30, it is a remarkable bargain at \$22.80.

\$22.80

OIL COOKS and PORCH FURNITURE greatly reduced. Lay in your requirements for next year—it will pay you big dividends.
